Monarch's Customer Services ... are designed for you!

PLANNING . . . Before you start any home improvement project, have a qualified Monarch Home Improvement Consultant call on you at your convenience. Our Consultant will give you advice and estimates without obligation. Help is available just for the asking at any one of our 75 branch offices or in the privacy of your home. Monarch's Home Planning Service offers you a drafting and blueprint service at a nominal cost. Our Consultants have the knowledge of local needs and conditions and are ready to give you personal, competent service. You will enjoy this service, as well as the every day low prices you receive at Monarch Lumber.

MATERIALS . . . At Monarch are the most varied and complete in Western Canada. We stock the latest in all building and remodelling materials. When you shop at Monarch, you are assured of the finest quality building products at the lowest prices available.

LABOUR . . . We will build all or part of your room, if you wish; or we will advise you every step of the way on how to "Do-it-yourself." Labour charges may be budgeted along with the materials used. Put the 55 years of Monarch experience to work for you today.

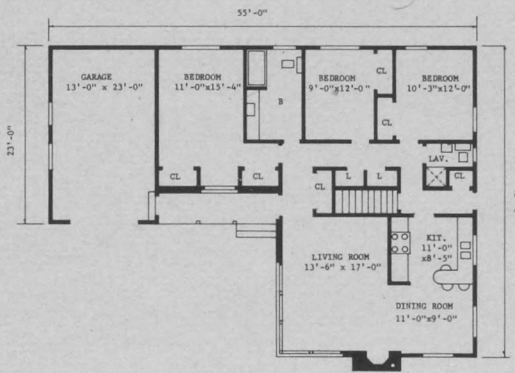

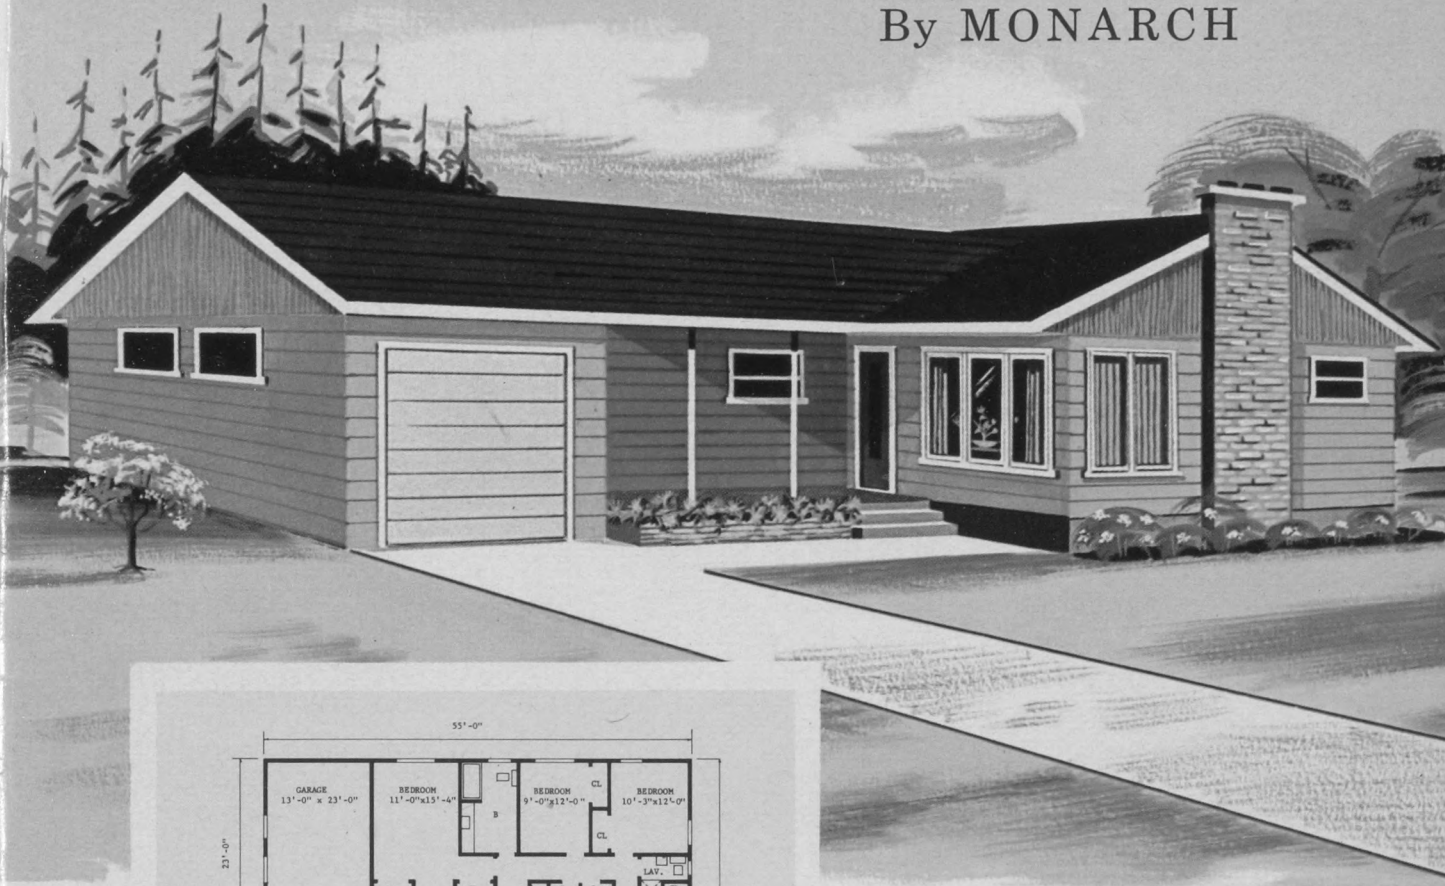

FINANCE . . . Monarch Lumber can arrange convenient easy budget terms on a long term, reasonable basis. No down payment, pay a few dollars per month. Credit is quickly arranged. Monarch Lumber will be happy to help you arrange a loan for any project. For further details see page 53 of this catalog.

*Call your nearest
Monarch Manager today!*

CATALOG PRICES . . . Prices shown in this Catalog are the lowest prices at the time of printing. Due to changing market conditions, all prices are subject to change without notice. Should the market lower, Monarch Lumber will pass the savings on to you and if it should increase we will necessarily have to increase our price. You are always assured of highest quality building materials and lowest possible price.

**PRESSURE TREATED
FENCE POSTS and
BUILDING POLES**

FENCING

Pressure treated fence posts are scientifically treated to ensure durability. When buying or building be sure to specify "Pressure Treated Fence Posts."

CUT AWAY DRAWING OF TYPICAL POLE-TYPE BUILDING

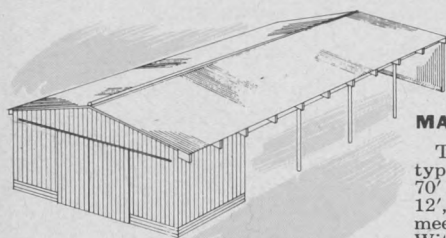

- (1) Pressure treated poles are placed in the ground to a depth of three to five feet, depending upon the type of soil and the size of the building.
- (2) Splash boards, pressure treated, are placed around the building next to the ground.
- (3) Plates or girts are spiked to both the inside and the outside of the poles for rafter and roof support.
- (4) Two-by-four-inch purlins are normally set on edge, giving greater strength and permitting wider spacing of rafters. Roof is fastened directly to the purlins.
- (5) Rafters are fastened directly to the anchoring poles by knee braces. These braces ensure rigidity of the building.

*There is a BASIC POLE BUILDING
PLAN FOR YOUR EVERY NEED.*

**MORE PROFITABLE — MORE
EFFICIENT FARMING WITH POLE
TYPE FARM BUILDINGS . . .**

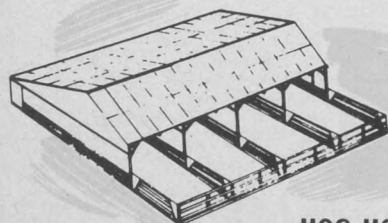

*Pressure Treated Lumber Practically
Eliminates Repairs and Maintenance Costs*

**MODERNIZE YOUR FARM
WITH THESE POLE TYPE STRUCTURES**

MACHINERY SHED

This clear span "pole-type" shed measures 26' x 70' and may be adapted to 12', 14' and 16' bays to meet your requirements. With a minimum of engineering this pole free interior can be extended to greater widths and lengths.

HOG HOUSE (PIGGERY)

Designed specifically for pigs this "pole-type" building will hold approximately 40 pigs per 14' bent. With self feeder and heated water bowls it requires only one man hour per day to look after 200 to 250 pigs.

HAY FEEDER

Ground level hay storage that enables you to store hay where you plan to feed it. Feed dairy or beef cattle with chopped or baled hay.

LOUNGING BARN

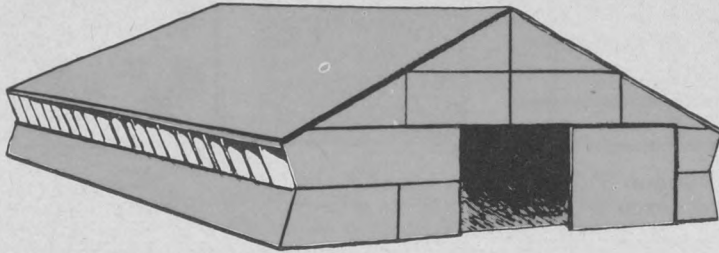

Designed for multi-purpose uses, this "pole-type" barn measures 42' x 96'. It has a 14' drive through area in the centre of the building which provides easy access for straw storage and many other farm purposes.

FARM "PLANNING SERVICE"

OFFERS YOU MORE IDEAS . . . FOR LARGER PROFITS

Development of Monarch's Farm Planning Service, all up to date information and each class of building is researched from both Eastern and Western Canada and also the United States.

The service is designed to meet the building requirements of all types of farm structures. Plans for all classes are available and can be easily obtained from your Monarch Lumber Dealer, nearest you. Put Monarch Lumber's fifty-five years of experience to work for you today . . . you will be glad you did!

RIGID FRAME FARM BUILDINGS

Economical, post free, wide span buildings — for farm, community or commercial use. The versatile, rigid frame building is designed for the rugged Western Canadian climate. It will stand snow loads and wind pressure of over 40 lbs. per square foot. Used on farm for machinery storage, grain storage, poultry house, stock or hog barns. Commercially can be used as plane hangar, general store, hardware house. Also useful as Community rinks and churches.

Complete material to build 25' x 40'. Only . . . **\$773.00**

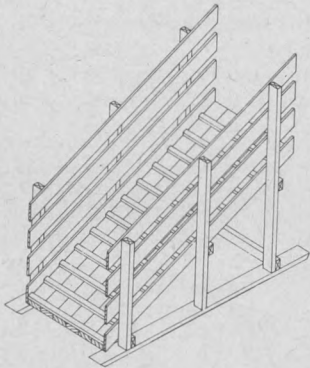

POLYTHENE —
FRAME STRUCTURE

GREENHOUSE

This greenhouse is seventeen feet by forty feet and the sashes can be removed for storage and also slide down when ventilation is required. The skeleton framework consists of 2" x 4" material and the sash frames 1" x 2" material. Large frames are braced diagonally with galvanized wire. The curtain walls are 5' above the foundation for large growing plants. Plans and material are available at all Monarch branches.

Ask your Monarch Dealer to quote you
on a size to suit your requirements

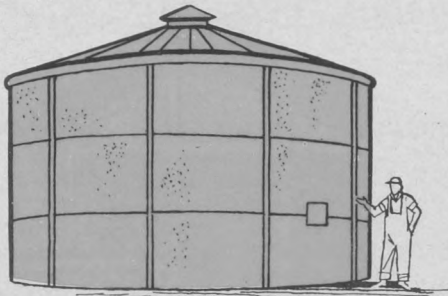

PORTABLE LOADING CHUTE

This portable loading chute can be used for any type of livestock. It can be set at a stable door or a corral when required and pulled out of the way when not in use. Plans available at Monarch Lumber.

Each. **\$21.50**

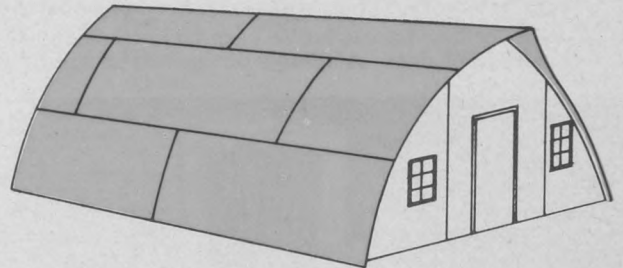

1,000 BUSHEL CIRCULAR GRANARY

Better grain storage at less cost per bushel . . . with circular plywood granaries. Strong, durable burstproof construction. Plywood bonded with waterproof glue ensures that granary will stay snug, crack-free, rigid — in rain, hail, snow or sun, in any weather, any climate, anywhere.

Materials precut ready to erect. . . **\$204.00**

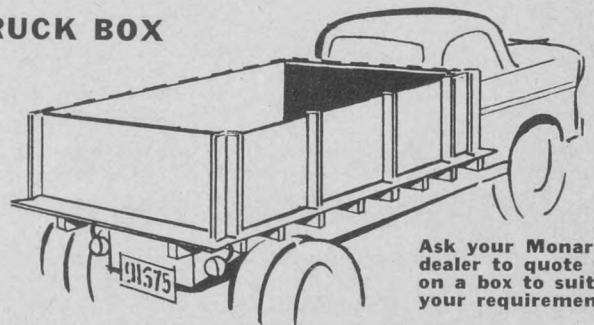

12' x 14' PORTABLE BROODER HOUSE

Easy to build — this portable brooder house consists of quality materials including durable all purpose plywood. Extra rigid yet light in weight, this unit provides tight, draught free accommodation for approximately 300 chicks. Complete materials to build are provided, including plywood, framing material, skids, all necessary hardware and complete assembly instructions.

Complete for only . . . **\$175.00**

TRUCK BOX

Ask your Monarch
dealer to quote you
on a box to suit
your requirements

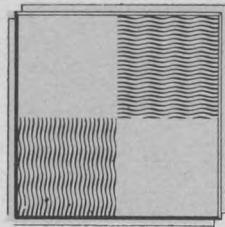

Designed to conform with all Highway Safety Codes, this truck box is easy to build at home. All materials are of top quality grades. Fir flooring is 2" x 6" tongue and groove while ends and side walls are 3/4" SylvaDouglas Fir plywood, 32" high. Easy to follow construction plans are included in the complete package.

J - M decorative ceiling panels also are available in two soft, warm, solid colors — cloud white and Bombay ivory. They are ideal for rooms when attractive, yet low cost ceiling is desired.

J - M ceiling panels are so easy to keep clean. Completely washable — even the printed designs will not fade or dull. A sponge dampened in mildly soaped water will remove stubborn dirt or smudges.

JM COLORBESTOS SIDING with DERMATONE FINISH

For new homes or re-siding your present home. Made of asbestos and cement, J-M Colorbestos Siding is fireproof, rotproof, permanent as stone . . . easily applied over clapboard or stucco sidewalls. Costs little to apply and saves the expense of costly painting year after year. Comes in 7 beautiful Permatone colors, vertical striated pattern and a straight butt edge.

JM Spintex Insulation

. . . can
save you
up to 30c
on every
fuel dollar

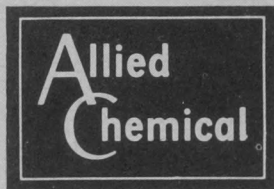

Insulation pays for itself in fuel savings. Keeps your home warmer in winter — up to 15 degrees cooler in summer. Spintex is a long fibre mineral wool. Fireproof, rotproof and will not nourish vermin. Rigid, will not slump. Easy to install yourself. 15" wide for 16" centers, 23" wide for 24" centers. Available in the following thicknesses: 2" batts (semi-Thik); 3" batts (Ful-Thik); 4" batts (Extra-Thik). J-M Spintex is also available in easy pouring — easy to handle Loose Wool.

Remember, once you insulate correctly with Spintex, you never have to touch it again. It lasts a housetime!

YOU'LL FEEL SAFER WITH THE

ORIGINAL SELKIRK INSULATED FACTORY-BUILT CHIMNEY

*For 30 years, the Canadian leader
in prefabricated chimneys!*

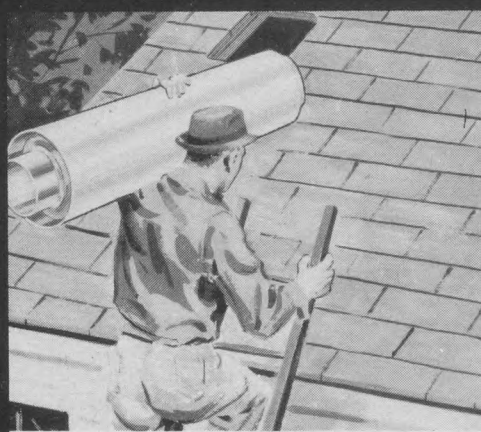

Easy to order • Easy to install • Hard to beat!

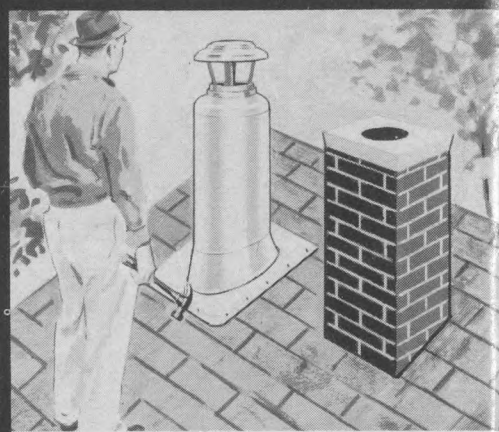

1 Are you adding a new room with a separate heating unit? Buying a new furnace or space heater? Converting to gas fuel? Is your present masonry chimney in need of repair? Does it give proper draft? Are you worried about chimney fires? Then you should find out more about Selkirk, the original factory built chimney with a lifetime stainless steel flue.

2 Immediate deliveries from stock, and it's so light you can easily handle it with a pick-up truck, or car top carrier. Available in four lengths: three foot, six foot, seven foot, and eight foot, that lock together with simple "push fit" to suit any length you require. No worry about messy mortar, sand, bricks, tile, etc. Selkirk is the "Chimney in a Package"!

3 Installation? Just follow the illustrated sheet included with every shipment. Step by step, you'll see, in pictures, exactly how it's done. One or two hours is all you'll need, and you can be sure of years and years of first class chimney performance with a Selkirk.

4 Roof top design — the regular chimney is modern round design of weather resistant material. However, you may choose as an optional extra, the traditional square brick design. If you prefer, you may order the square design later. Either way, round or square, you will be happy with the clean, neat appearance of the Selkirk.

2 BASIC CHIMNEYS to choose from:

1 ALL-FUEL CHIMNEY

suitable for all fuels, oil gas, coal, wood and domestic incinerators.

2 GAS-VENT

suitable for approved gas-burning appliances only.

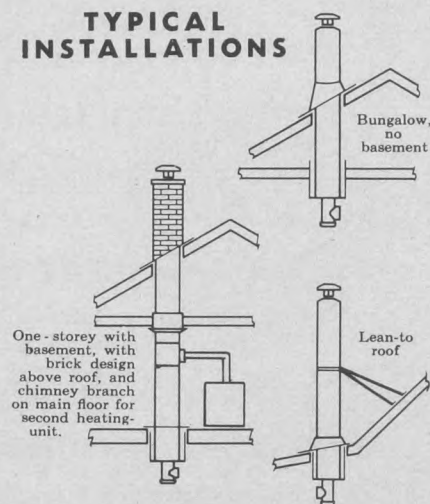

BOTH INSULATED
for top performance and safety!

FEATURES:

- 30 years experience in all parts of Canada
- Easy to install, in any weather
- No bricks, mortar, foundation
- Lightweight, no "settling" problems
- Efficient operation, good draft
- No chimney cleaning, under normal conditions

VIEWTITE and CONVERTIBLE WINDOWS

by
CURTIS®

Your choice of three methods of operation

Crank

Push-Bar

Latch

The Viewtite and Convertible window by Curtis may be operated by any one of three methods: crank, push-bar or latch.

Crank — mechanical operator with detachable arm, copper-tone finish; operates with screen in place.

Push-Bar — permits easy operation without removing screen. Copper-tone

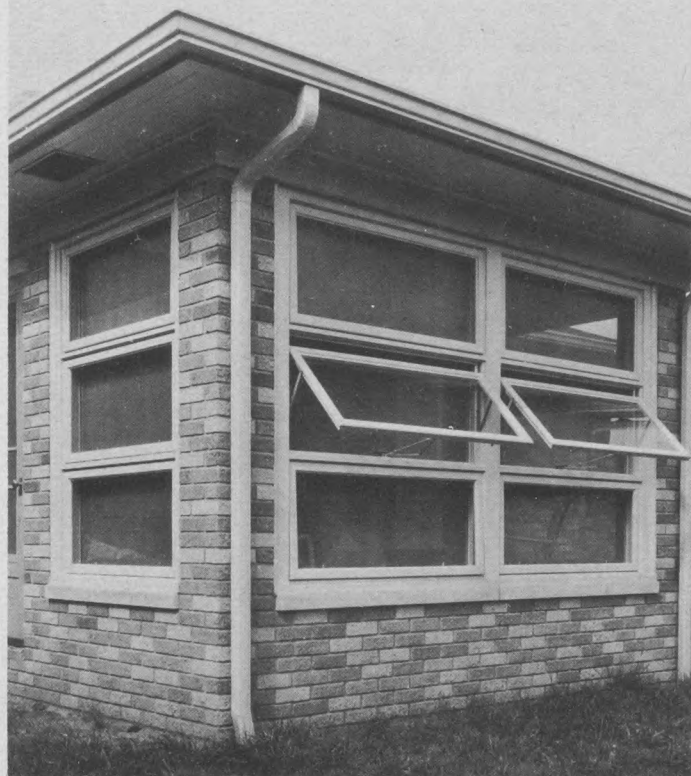

Latch — right or left hand face-mounted metal peg latch for manual operation.

New Viewtite window by Curtis will give your home plenty of viewing area and make ventilating easy in all kinds of weather. Viewtite is one of the most weather-tight windows available. Made of preservative and water-repellent treated, selected pine. Viewtite windows may be used singly or in combination, are available in a wide range of sizes for use in every room. The two sash glasses are separated by less than 3" of wood, providing more viewing area and neat, trim lines to complement all styles of homes. Viewtite windows adapt to any type wall construction.

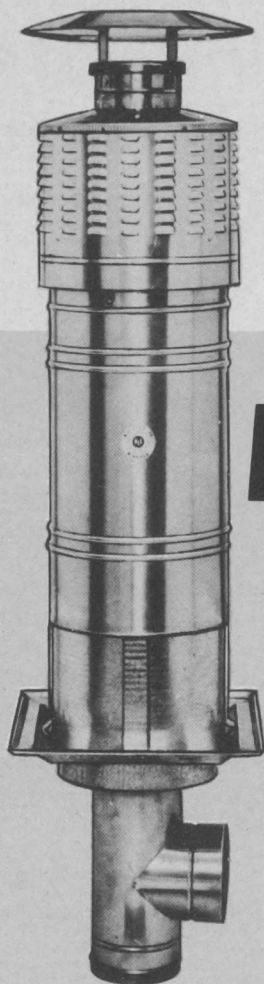

CURTIS CONVERTIBLE WINDOWS

Silentite Convertibles are factory weather-stripped and assembled basic units. These units can be combined in almost limitless varieties to provide practically any style of window arrangement and ventilation. With these units, you can have casements that swing either right or left — besides ribbon, awning, hopper, or picture window walls. The Curtis Silentite Convertible window represents an entirely new idea in window beauty — window comfort. No other window unit gives you all of these advantages.

- 1 Fits any wall construction.
- 2 A complete unit—quickly and easily installed.
- 3 Screens and removable glass panels available.
- 4 Also available with double insulating glass.
- 5 Fully weather-stripped to save fuel — shut out dust and dirt.
- 6 Preservative, water repellent treated for lifetime service.
- 7 Easy operation in all kinds of weather.
- 8 Several basic sizes provide hundreds of window combinations.
- 9 Brings window walls within reach of lowest cost homes.
- 10 **FITS ANY BUILDING AND REMODELING BUDGET.**
- 11 The Curtis Convertible, like all other famous Curtis windows—comes to you with guaranteed materials and workmanship—your assurance of lasting value.

Live like a King with—

WESTROC GYPSUM WALLBOARDS

And you can do it for less than \$54.00. That's the average price of face-lifting a 12 x 16 room, walls and ceiling, in your home with Westroc gypsum wallboard. Choose either the 16" width panels (at a slightly higher price) or the popular full sheets. Either way it's easy and inexpensive to transform "that old room" into a sparkling, attractive living room, den, rec-room or bedroom. And get fire protection, beauty (finish with paint or wallpaper)

plus permanent walls and ceilings that will not shrink or expand.

Or choose Imperial Westroc wallboard panels in wood-grained finishes . . . Silver Oak, Blonde Walnut, Fruitwood, or Mahogany . . . for all the appeal of rich wood panelling at a fraction of the cost! Pre-decorated Imperial Westroc panels are fire-resistant, will not shrink or expand. Apply with adhesives or simple nail application with special color nails — no joint treatment needed.

A complete line of Westroc Wallboards

WESTROC WALLBOARD — Fireproof gypsum wallboard with tapered recessed edge for easy joint treatment. Ivory coloured face paper for immediate decoration (paint or wallpaper).

Thickness	Width	Lengths
3/8"	4'	6, 7, 8,
1/2"		9, 10, 11,
5/8"		12, 14 ft.

WESTROC BACKING BOARD — Standard size sheets with grey mill finish for the first layer in two-ply application.

Thickness	Width	Lengths
3/8"	4'	8'
1/2"		

WESTROC 5/8" SIXTY — A specially processed wallboard with a minimum fire resistance rating of one hour. Each sheet carries the seal of the Underwriters Laboratories of Canada.

Thickness	Width	Lengths
5/8"	4'	8, 10, 12 ft.

WESTROC PANEL — Ideal for quick remodelling and wall finishing. Rounded edges and ivory face paper for immediate painting.

Thickness	Width	Lengths
3/8"	16"	7, 8, 10 ft.

IMPERIAL WESTROC — Pre-decorated panels in four wood grained finishes— Silver Oak, Blonde Walnut, Fruit Wood and Mahogany.

Thickness	Width	Lengths
Bevel Edge 3/8"	4'	7', 8'
Square Edge 1/2"

FIBERGLAS
CANADA LIMITED

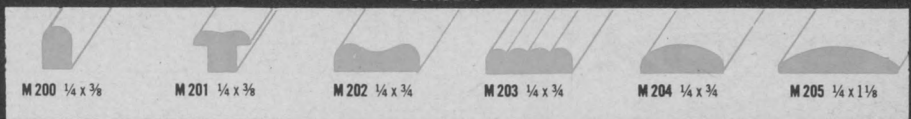

home insulation

Lighter than ever, and with a brand new "feel" that makes it a pleasure to work with. Paper on only one side makes for easier cutting. There are new insulating qualities, too. New Fiberglas actually springs to full thickness in the wall to fill all openings and prevent sagging. A new finer fiber process in which there are no shot or coarse fibers gives uniform thermal values. See the full line of Fiberglas Home Insulations now on display at Monarch Lumber.

ROOF TRUSSES

SOLVE YOUR PROBLEMS

Trussco prefab trusses are engineered and tested to comply with the most rigid building codes. In a recent load test, 2 - 26' 0" clear span Trussco rafters supported, successfully, a load of 330 — 72 lb. blocks which equals 23,760 lbs. This is equal to 230 lbs. per sq. ft. of live load. Trussco are continually striving to improve design and strength of their trussed rafters by a continuous testing program. All Trussco dealers have the proper fabricating facilities to build trusses which will meet the strictest specifications.

TWINDOW*

INSULATING WINDOWS

The modern way to keep homes warmer in winter . . . cooler in summer

Two sheets of quality glass, separated by a hermetically sealed air space, and surrounded by a stainless steel channel, give Twindow the insulating qualities that make it easier to maintain uniform, comfortable temperatures. Twindow minimizes chilly downdrafts, cuts heat loss, virtually eliminates condensation and frosting. And there's no longer any need for the semi-annual chore of cleaning, changing and storing storm windows. Now you can have economical, efficient and permanent twin-glass insulation for every room in your home with Twindow.

*T.M. REG.

MADE IN WESTERN CANADA by CANADIAN PITTSBURGH INDUSTRIES

Twindow is manufactured in Moose Jaw, Sask., to meet the growing demand for a quality insulating window in Western Canada. It's guaranteed for 5 full years by Canadian Pittsburgh Industries, a nationally-known, reputable company.

*Over 100 standard sizes immediately available
to suit every situation . . . every budget*

NEWEST, EASIEST WAY TO PAINT HOMOGENIZED SPRED SATIN

This new 100% latex Vinyl-Acrylic Spred Satin is better than ever because now it's homogenized.

Like the wonderful Spred Satin you've used for years, this new latex paint still dries in just 20 minutes. But just look at the added features of new homogenized Spred Satin!

- Needs no tedious stirring, three or four turns of the paddle and you're ready to paint.
- Goes on easier, hides better.
- Gives an even smoother surface.
- Use anywhere inside on walls or wood-work.
- Easier to keep clean than enamel.
- Will not chip or flake.
- Wide range of colors. See them at your nearest Glidden dealer.

Now The Easy Paint for "Lazy" People Is Easier Than Ever To Use!

INSIDE, OUTSIDE . . . ALL AROUND THE HOUSE

Use quality Glidden products for all your painting purposes!

SPRED HOUSE PAINT

You can gain at least a year between paintings with exterior Spred House paint. Easy to apply and dries quickly (in about 20 minutes) to a durable finish that outlasts conventional paints by years. Tough and weather-proof. Repels dirt while it retains that "just-painted" look longer. Exterior Spred House paint saves you time and money . . . makes your house look fresh and new again. Available in a wide range of rich-looking, contemporary colors.

GLID-TONE STAINS

Add a natural-looking wood finish with Glid-Tone Wood Stains . . . the all-purpose, pigmented stains for wood plywood and veneer. Brings out the beauty of wood grain and holds colors evenly. Easy to coat over with varnish, shellac or lacquer. Over 60 attractive Glidden Glid-Tone stain colors to choose from.

XPERT POLYURETHANE VARNISH

Here's the answer to wood finishing problems. XPERT seals, primes and finishes . . . while it brings sparkling new beauty to unfinished or previously finished surfaces. Ideal for wood floors, woodwork, furniture, cabinets, wood paneling, counters and table tops. Applies easily for luxurious wood grain effects.

STOP WASTING HEAT!

BE SURE YOU ARE PROPERLY INSULATED WITH

ZONOLITE INSULATION

Zonolite Loosefill Insulation will save you countless dollars in fuel bills next winter. It will keep your home cooler in summer too! We recommend a 4" level of Zonolite over your ceiling for greatest efficiency. Recent tests have found your investment is paid back in fuel savings.

Pour fireproof Zonolite between your ceiling joists. It fills in easily around pipes and wiring and will not settle. Light to handle, a bag of Zonolite weighs only 22 pounds. Stop that heat loss in your attic now! Install Zonolite — and cut your heating bill.

Ask us for the amount of Zonolite needed for your home.

JOHNS-MANVILLE

WEATHERTITE SHEATHING

For All Exterior Sheathing Applications

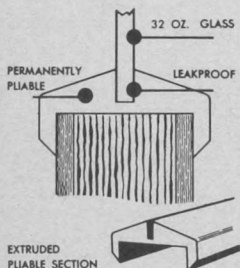

Asphalt Impregnated . . . weather-proof all through — a rigid sheet of exceptional strength, moisture resistant. Provides exceptional insulation value, saving fuel for the home owner. The large, handy sizes reduce the application time and minimize cutting to incur less than 5% waste material. Available in 4' x 8" or 4' x 9' panels, 7/16" thick.

PERMANENCE OF DOR-SEAL

Dor-Seal is a glazing moulding formulated for pliability and extruded to exact dimension.

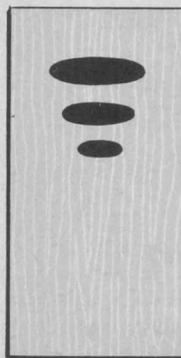

Internationally accepted by leading door manufacturers, this patent glazing method has made possible the up-dating in design of glass openings in doors—shapes heretofore considered impractical or too costly.

Moulding requires no painting—it is colour styled in rich matching shade for framing distinction.

All designs are available in obscure, or pattern glass if required.

**SASHLESS WINDOWS ARE
BONUS BUILT FOR YEARS
OF SATISFACTION!**

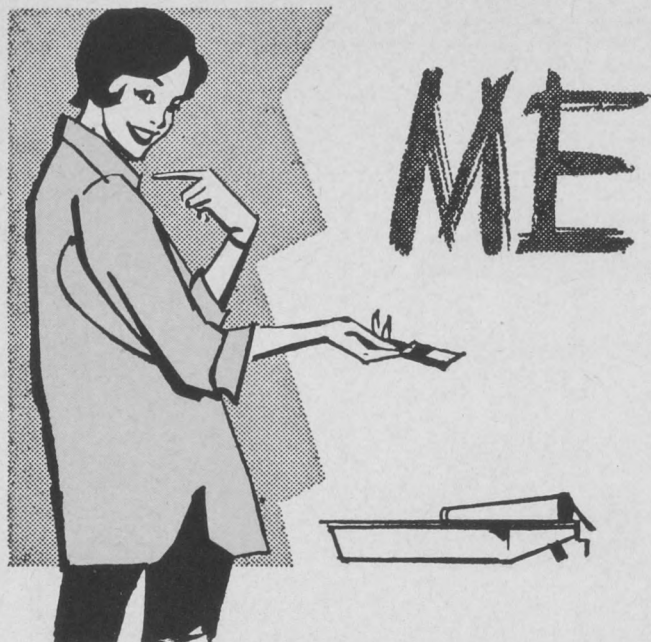

They're sashless — no bars to mar your view — CRYSTAL PANORAMIC "Full-vision" Sashless windows give you 25% more vision than old type windows. And you'll be delighted with CRYSTAL PANORAMIC'S "inside washing" feature. These clear glass panes lift out in a jiffy — you wash both inside and outside — "inside the house." No more window-sill acrobatics ever — with CRYSTAL PANORAMIC!

You'll like the good looks of CRYSTAL PANORAMIC too — with storms and screens to go with them.

Patented safety locking device makes CRYSTAL PANORAMIC windows "prowler-proof" — another good point for CRYSTAL PANORAMIC . . .

Super Kem is making this room say

*A beautiful new room between
breakfast and dinner time!*

That's the beauty of

SUPER KEM-TONE and KEM-GLO

BORED WITH LAST YEAR'S COLORS?

Easy to apply, Super Kem-Tone dries in 30 minutes to a velvet finish on walls and ceilings. Kem-Glo the miracle alkyd enamel that looks like baked enamel, in exactly matching colors, goes super smoothly onto woodwork and makes kitchens and bathrooms look fresh and bright again!

We'll lend you, free, the new Kem Color Harmony Guide! It's easy to use and fun to choose from. Two thousand correct color harmonies.

INTERIOR

A-100 LATEX HOUSE PAINT

A-100 goes on so smoothly and so swiftly: dries in 30 minutes. Blister resistant. White stays white.

MARTIN-SENOUR 100% EXTERIOR HOUSE PAINT

An oil-type exterior paint for wood siding, trim & metal surfaces. Ready for use, just stir and apply. Holds its color, gives a "2-coat look" at 1-coat cost!

VILLA HOUSE PAINT

full-bodied oil paint for a superb white appearance. Exceptional hiding power. Reliable surface protection for all outside surfaces.

QTS.... \$2.15 GALS.... \$7.10

EXTERIOR

BEAUTIFUL FLOORS with MARTIN-SENOUR PORCH and FLOOR ENAMEL!

Goes easily on wood or concrete floors, protects new floors, gives a new look to old ones!

MARTIN-SENOUR MULTI-USE ENAMEL

Sparkling high gloss enamel that'll do 100 jobs indoors and out. Easy-to-apply, completely washable, heat resistant, won't crack or chip.

VILLA BRAND LATEX SATIN

In new "hushed" shades that give a satin finish to interior wall surfaces. It dries in a wink and is almost odorless. One gallon covers most rooms.

QTS..... \$1.95 GALS..... \$6.35

VILLA BRAND SEMI-GLOSS

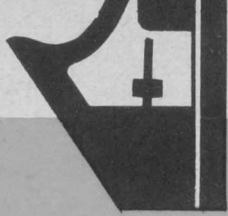

For woodwork, cabinets or "traffic" areas, washable. Color-matched to Villa Latex Satin.

QTS.... \$2.25 GALS.... \$7.85

KEM-VAR VARNISH

For floors, furniture, woodwork & other surfaces — stays gleaming even after years of wear.

Sta-dri Masonry Paint decorates in white and five beautiful colors, at no extra cost. Holds 9' wall of water without leakage, even if applied inside a basement, just mix the powdered ingredient with water and apply with brush or spray. Does not powder or brush off. Economical. Resists erosion. Stays white when wet. 5 lb. box, \$2.80; 25 lb. bag, \$13.20.

MONARCH

makes it easy . . .

a GARAGE of your choice NO DOWN PAYMENT! AS LOW AS \$10.00 PER MONTH

MONARCH'S PRE-CUT GARAGES . . . to suit your budget and purpose — from low cost package deal to custom made. Built from finest materials available that will give you years of satisfaction. Feel free to discuss your requirements with the Monarch Yard Manager in your district. He will arrange a competent builder to erect your garage. All materials and labor can be placed on Easy Budget Terms. Door lights optional — extra.

Protect your car investment this winter. Purchase only the materials, or have our skilled craftsmen do the complete job for you now. Remember, there's no down payment . . . No carrying charges imposed until payments begin. Finance plans are tailored to your budget.

A wide variety of garage plans are available, for one- or two-car sizes; some with attached screened porches; all adaptable to fit in beautifully to the design of your house and lot.

Call in today — Let's talk it over!

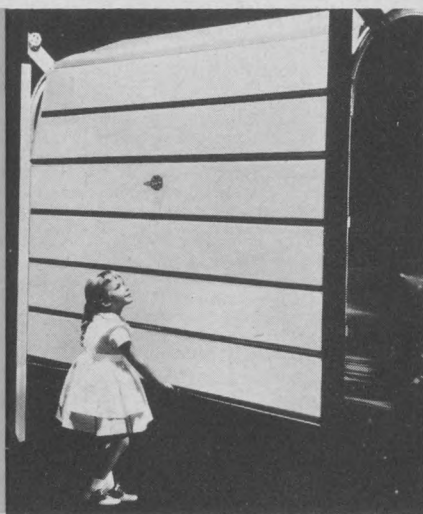

THE "BERRY"

METRO GARAGE DOOR

Easy to operate, the Metro is ruggedly constructed of high grade Satincoat steel. It will not warp, peel, crack, or rust. The exclusive diagonal grid design is the strongest method of reinforcement, yet makes it the lightest, most rigid door on the market. Full five year guarantee on all parts and components.

8' x 7' Each \$61.95
9' x 7' Each \$68.50

Other sizes available

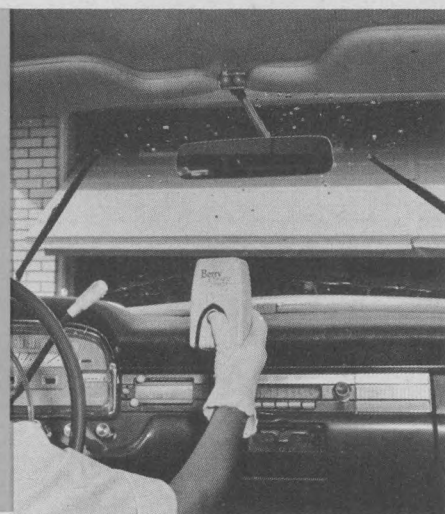

THE "BERRY"

CRESTLINE SECTIONAL DOOR

The most advanced sectional door made! Whisper quiet! Superbly engineered! Constructed of light weight steel that will not warp, shrink, peel, crack, or rust. Open it from either side. Climate proof weatherstrip of durable vinyl will not crack or freeze to ice. All parts and components guaranteed for five full years.

8' x 6' 6" or 8' x 7' Each . . . \$74.50

Other sizes available

THE "BERRY"

REMOTE-AUTOMATIC OPERATOR

No more climbing in and out of the car, lifting doors, or fumbling for keys in the dark! A small box, which can be kept in the glove compartment or attached to the visor and transferred from car to car, controls the new Berry Remote-Automatic. Its remote signal opens the garage door and turns on a light. Easily installed — requires little or no maintenance.

Each \$209.00

HOW TO GET A GOOD CONCRETE JOB

IMPORTANT — Do not add extra water to your concrete mix. Addition of water beyond specified limits always results in a concrete less strong, less durable, and less watertight.

TRIAL MIXTURE FOR FIRST BATCH

Do-It-Yourself Mixes	KIND OF WORK	Cement	Sand	Gravel	Imperial Gallons of Water To Add for Each Sack of Cement in Mix		
					Dry Sand	Moist Sand (Ave)	Wet Sand
	Thick footings or foundations, walls that need not be watertight retaining walls, etc.	1 shovel full	2½ shovels full	4 shovels full	5	4¼	3½
	Watertight basement walls, floors, steps, sidewalks, driveways, piers, columns, beams.	1 shovel full	2 shovels full	3 shovels full	4¼	3¾	3¼
	Fence posts, flower boxes, benches, bird baths, and any thin section about 2 inches thick or less.	1 shovel full	2 shovels full	2 shovels full	3½	3	2¾

It may be necessary to vary the relative amounts of sand and gravel slightly to obtain the required degrees of workability. The amount of water should not be varied beyond the limits recommended in the table.

RECOMMENDED STEPS FOR MAKING GOOD CONCRETE

1. Use only good, clean aggregate free of materials such as dirt, clay, coal or organic matter.
2. Use clean water — it should be fit to drink.
3. Mix the concrete thoroughly so that each particle of aggregate is completely coated with the cement paste.
4. After placing, consolidation of the concrete by vibration, or by spading or rodding, is recommended. This will eliminate "honeycombing" and unsightly air pockets.
5. On all flat work:
 - (a) before placing the slab, paint the surfaces of all rigid objects with which it will come in contact, with oil, so they will not stick to it.
 - (b) dummy joints, about one-quarter the thickness of the slab, should be placed at no greater than 10-foot intervals in each direction.
6. After placing flat work (sidewalks, driveways, etc.) the concrete is struck off with a straightedge to level the concrete. The concrete is then sometimes floated with a long handled float, which gives a smoother finish than the screed. Further finishing should be delayed until water sheen has disappeared from the surface of the concrete.
7. Concrete should be kept continuously moist for at least 5 days to prevent evaporation of the mixing water. This is called curing. A common curing method is to cover the concrete with burlap, sand, straw, or similar materials. These materials are kept damp during the curing period. Another method is to cover the concrete with a vapor-sealing material, such as polyethylene or water-resistant Kraft papers, to seal in the water and prevent evaporation. Commercial curing compounds can also be used. These are sprayed on the fresh concrete to seal the surface. In vertically formed concrete, a simple way to prevent the concrete from drying, is to leave the forms in place.

F Abitibi Platewood Crib Board - Coffee Table . . . This popular combination Crib Board - Coffee Table is inexpensive and easy to build. An ideal leisure time project. Complete materials and instructions included. Complete for only **\$7.89**

G Pre-Cut Lawn Chair . . . A most popular design. Plenty of comfort on lazy summer days. Strong construction—all parts pre-cut. Build it in minutes and save money. Other designs also available. Complete instructions included. Complete for only **\$3.98**

H "Water Queen" Boat Kit . . . Can be completely assembled in only 16 hours without the added cost of special tools. Pre-drilled longitudinal members, cut and ready for assembly to frame. Preassembled frame. Ready cut and shaped plywood sides and bottom. Ready cut deck, side trim and seat. Ready shaped stem. Complete assembly instructions. Screws and marine glue. Transom frame parts (already assembled). Ready bent outer stem.
14 Foot "WATER QUEEN," accommodates up to 25 H.P. motor. Only **\$165.00**
16 Foot "WATER QUEEN," accommodates up to 40 H.P. motor. Only **\$219.00**

DRING

LAMINATED STRUCTURES LTD.

FOR STRENGTH . . . ECONOMY . . . VERSATILITY

Interior View of Church with Dring Laminated Arches
Adds Beauty and Structural Strength.

Early stage of erection.

Nearing completion.
This building was erected in one day,
complete.

Save time and money

The efficient and inexpensive Dring Laminated Rafters provide more usable space, gives a clear, unobstructed, post free floor area that is so greatly to be desired in buildings of this nature. It is used extensively in Schools, Churches, Dwellings, Commercial and Industrial for beauty and economy.

DRING framing members provide the strength and quality desired to provide unobstructed areas, so often required in Industrial buildings, Farm buildings and Warehouses. Contact your Monarch Lumber Manager nearest you for specifications and quotations on your particular needs. Custom Built to suit your requirements.

DRING ARCH RAFTER UTILITY SHED

For economical and practical uses, the illustrations on the left are of a standard nature. Each has been engineered to comply with the normal design loading requirements in most areas. Custom Built orders can also be supplied to suit the individual job or fabricated in accordance with the specifications of others. The attractive finish and efficiency of Dring Products is a direct result of good workmanship, top grade West Coast materials and careful handling. Only kiln-dried stock is used and laminated under controlled conditions of temperature and pressure as specified by the qualification code of The Canadian Institute of Timber Construction.

The two illustrations on the left show two stages of building erection. The erection of your Dring Arch Rafter Building can be completed in a matter of hours. Full engineering and drafting services available upon request from the factory. The following are prices on the Dring Utility Shed as pictured at the left and contains all the basic materials required.

32' x 48' — Complete Materials for
Utility Shed. **Only \$1,515.00**
(Less Floor)

24' x 36' — Complete Materials for
the Vertical Front Buildings - **Only \$729.00**
(Less Floor)

The following are a list of uses of Laminated Wood Arches

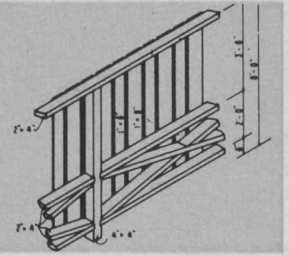

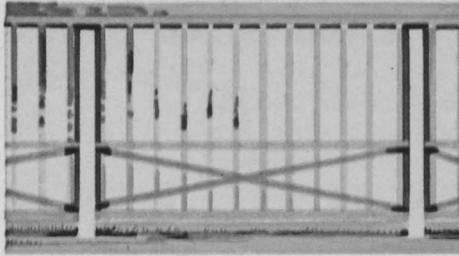

- ★ Farm Buildings
- ★ Curling and Skating Rinks
- ★ Churches
- ★ Warehouses and Industrial Buildings
- ★ Dwellings
- ★ Stores
- ★ Motels and Hotels

SYLVAPLY WATERPROOF GLUE PLYWOOD

No matter what you build or remodel you finish the job with a special sense of satisfaction if you work with Sylvaply. Tough, rigid Sylvaply builds in additional sturdiness, weather resistance and permanence. Use it indoors or out — on jobs as big as a barn or as small as a shoe box — and you'll always be glad you chose Sylvaply Douglas Fir Plywood.

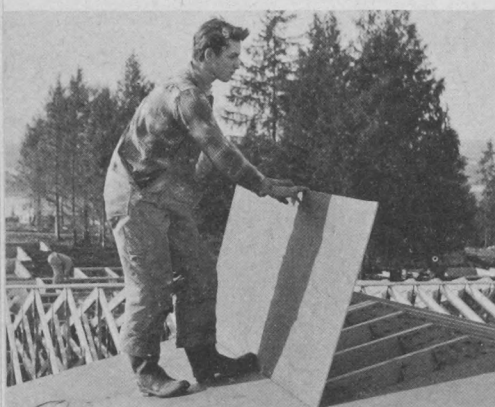

SYLVAPLY T & G SUBFLOOR PANELS

T & G panels lock together to make a smooth, rigid deck that serves as subfloor and underlayment for flexible floor coverings. No blocking-up of edges, less nailing needed. As farm building flooring, it can't collect rodent-attracting grain in cracks . . . seals out drafts . . . easy to keep clean.

MONO-DOR FLUSH DOORS

Sturdily engineered with extra-heavy kiln-dried framing and selected Sylvaply Douglas Fir plywood faces. Types for interior and exterior installation. Illustration shows the new "Tallboy" ceiling-height Mono-dor.

SYLVAPLY ROOF AND WALL SHEATHING

Under the siding of modern homes, as "single skin" cladding on farm buildings . . . for all uses requiring a low cost construction grade of strong, durable Douglas Fir plywood, get weatherproof Sylvaply Sheathing grade — Canada's busiest building material.

Choose Sylvaply STAINCOTE Sheathing for "single skin" cladding nailed right to the studs. Durable, factory-applied stain gives a finished look and helps repel moisture.

PERMASHIELD

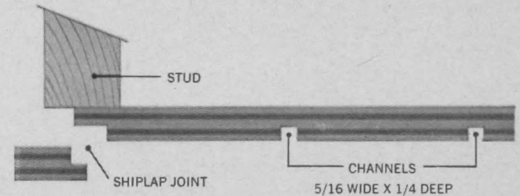

PERMASHIELD

Patio screens and garage doors shown are only two uses for versatile PERMASHIELD. PERMASHIELD is Sylvaply plywood with a hard, tile-smooth facing of resin-fibre permanently bonded on. Perfect for single skin siding and all applications where complete weather-resistance and a perfect paint job are desired.

PERMASHIELD CHANNELPLY

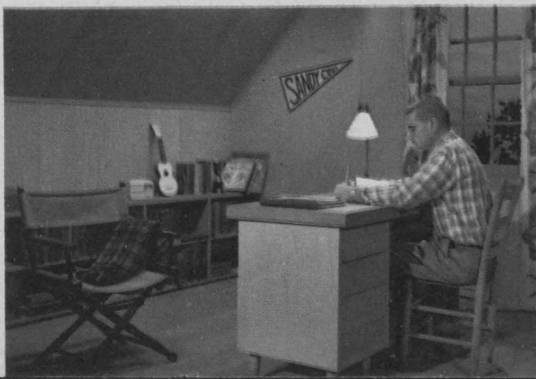

Smooth, resin-fibre faced PermaShield is given a bold "plank" effect with deep, square-cut grooves. Shiplap edges provide a tight weatherseal and conceal joints in place. For combined sheathing and cladding, or as "accent panels," PermaShield Channelply offers a durable, dramatic and supremely paintable material.

SYLVAPLY SANDED PANELS

Use smooth sanded Sylvaply Good One Side panels for Kitchen Cabinets, built-ins, shelving, panelling, and remodelling.

CREATE EXTRA ROOMS
WITH 1/4" SYLVAPLY G1S

REMODEL YOUR KITCHEN
WITH 3/4" SYLVAPLY G1S

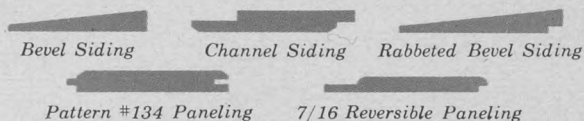

For cupboard doors and small projects, get Sylvaply TAKE-HOME panels — handy small sizes for those odd jobs.

Most Enduring and Endearing of Canadian Woods . . . So Light and Easy to Use . . . So Handsome and Practical Indoors or Out!

WESTERN RED CEDAR SIDING

. . . patterns to choose from. Rough sawn texture for stain finish or satin-smooth surface for finest paint finish. Give exterior walls style and beauty that never dates . . . charming and durable for the lifetime of your home.

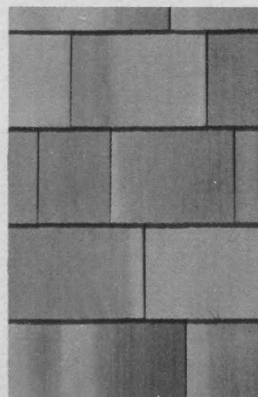

WESTERN RED CEDAR PANELING

. . . patterns available. Provides rich, warm walls of lasting beauty. Shadow lines of patterned joints combine with subdued natural grain to create wide range of fine interiors. Stain softly or finish natural. Enjoy the warmth and luxury of genuine Solid Cedar paneling.

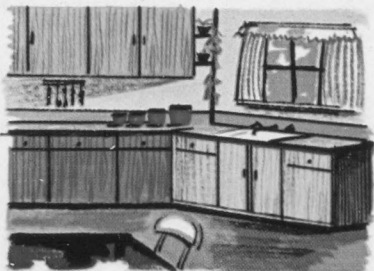

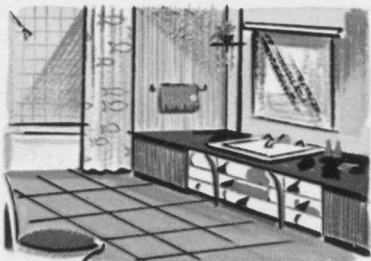

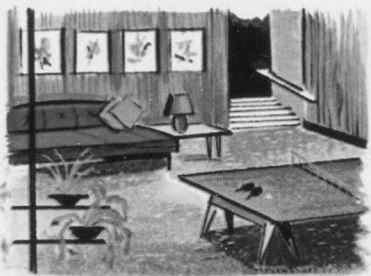

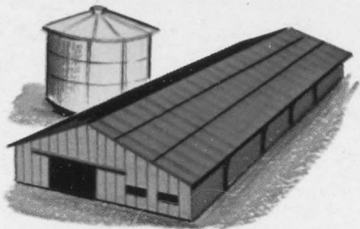

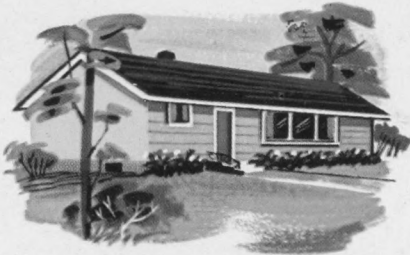

WESTERN RED CEDAR SHINGLES and SHAKES

Choose formal roof of machine-squared shingles (left) or dramatic texture of handsplit shakes (right). Either way, you get the best looking and longest lasting roof that money can buy. Resists decay. Withstands hurricane force wind. Graded, inspected and packed to rigid specifications. A grade to suit every need.
